Kingsport
Regional ITS Architecture Update
Kick-off Workshop

October 25, 2016

Kimley»Horn

Presentation Overview

Overview of ITS
- What is ITS?
- ITS Benefits
- ITS Applications

Overview of Regional ITS Architectures
- What is a Regional ITS Architecture?
- ITS Architecture Development Process
- Benefits of the Regional ITS Architecture

Discussion
- Existing and Planned Projects in the Region
- ITS Needs in the Region
- Regional Inventory and Needs

Kimley»Horn   TN TDOT Department of Transportation   KINGSPORT METRO Transportation Planning Organization

What is ITS?

ITS is an acronym that stands for
Intelligent Transportation Systems

One definition of ITS:
The application of data processing and data communications to surface transportation to increase safety and efficiency.

ITS Benefits

Increased roadway and transit efficiency

Enhanced incident and special event management

Improved safety for travelers, public safety, and maintenance personnel

Accurate and timely traveler information

Kimley»Horn

TN TDOT Department of Transportation

KINGSPORT METRO Transportation Planning Organization

ITS Program Areas

- Traffic Management

- Traveler Information

- Emergency Management

- Maintenance and Construction Management

- Public Transportation

- Archived Data Management

- Commercial Vehicle Operations

- Vehicle Safety

Traffic Management

Data Collection

Control

Roadside Traveler Information

Traveler Information

Traveler Information Website

511 Traveler Information Phone Number

Emergency Management

- Computer-aided Dispatch Systems

- AMBER Alerts

- Traffic Signal Preemption

- Video/Information Sharing

- Coordinated Incident Management

Kimley»Horn   TN TDOT Department of Transportation

# Public Transportation

Smart Fare Payment Systems

Automated Vehicle Location

Video Security Systems

Real-time Bus Arrival Information

Transit Signal Priority

Automated Passenger Counters

Commercial Vehicle Operations

Freight Administration

Weigh-In-Motion

HAZMAT Management

Freight Assignment Management

*Not a large component of regional ITS planning because CVO are mostly determined at a state level.

Kimley»Horn   TN TDOT Department of Transportation   KINGSPORT METRO Transportation Planning Organization

Maintenance & Construction Management

Smart Work Zones

Flood Detection and Closure Systems

Anti-icing Systems

Vehicle Tracking Systems

Archived Data Management

ITS Data Mart

ITS Data Warehouse / Virtual Data Warehouse

Emerging ITS Technologies

- Automated Vehicles
- Connected Vehicles
- Active Traffic Management
- Integrated Corridor Management
- Decision Support Systems
- Vehicle Detection System (Bluetooth)
- Privatized Traffic Data

Kimley»Horn   TN TDOT Department of Transportation   KINGSPORT METRO Transportation Planning Organization

Presentation Overview

Overview of ITS

- What is ITS?
- ITS Benefits
- ITS Applications
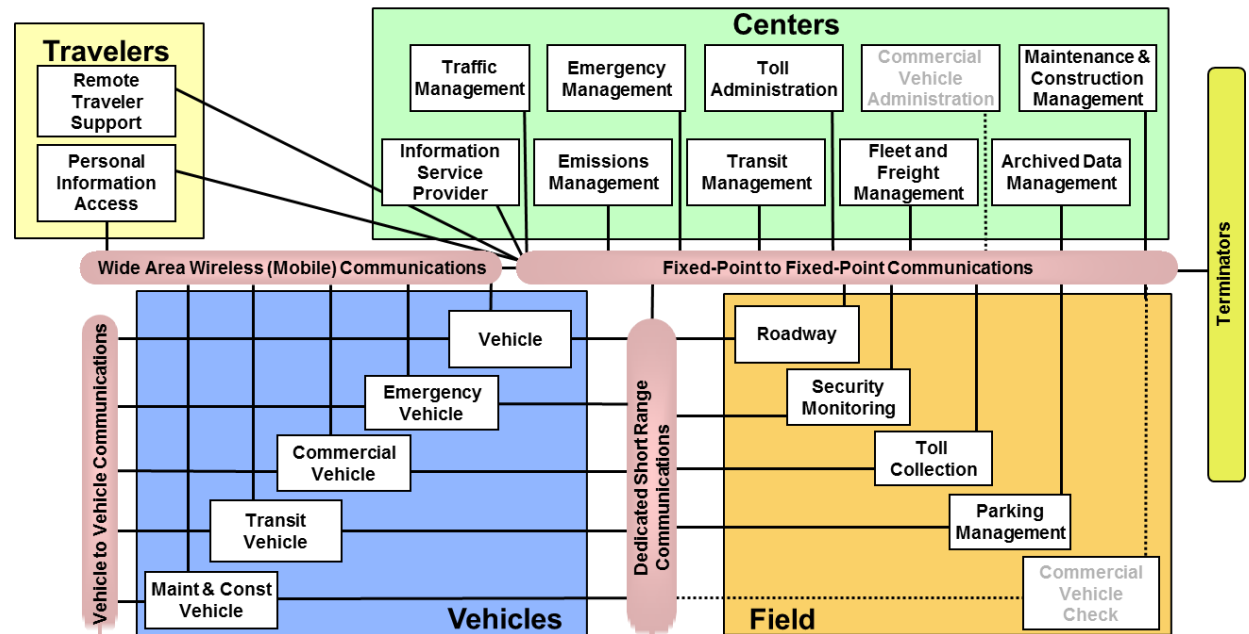

Overview of Regional ITS Architectures

KINGSPORT METRO
Transportation Planning Organization

What is a Regional ITS Architecture?

- A plan for implementing and operating ITS

- An ITS architecture defines:
  - Transportation needs
  - ITS solutions
  - Agencies to be connected
  - Projects to be deployed

ITS Architecture Deadlines

- Federal Highway Administration Final Rule and Federal Transit Administration Final Policy from 2001

    - Regions deploying ITS must have a regional ITS architecture in place by April 2005

    - Regions with no ITS deployed must have a regional ITS architecture developed within 4 years after their first ITS project reaches final design

    - ITS projects receiving federal transportation funding must conform to a regional ITS architecture

Kimley»Horn   TN TDOT Department of Transportation   KINGSPORT METRO Transportation Planning Organization

ITS Architecture Requirements

- Description of the Region

- Identification of stakeholders

- ITS needs

- ITS services to implement

- Information flows between elements

- ITS standards

- Sequence of projects

- Maintenance plan

Key Steps to Develop an ITS Architecture

Step One — **Identify ITS Inventory and Needs**

Step Two — **Develop ITS Service Packages**

Step Three — **Identify Projects for Deployment in the Region**

Identify ITS Inventory and Needs

Step One

- **Inventory**
    - Identify all existing and planned ITS components
    - Identify all existing and planned connections between components

- **Needs**
    - Identify transportation needs in the Region
    - Needs can be general or specific to ITS
   - Continually update needs list throughout the project

Kimley»Horn   TN TDOT Department of Transportation   KINGSPORT METRO Transportation Planning Organization

Develop ITS Service Packages

Step Two

- ITS service packages describe how ITS is operated in the Region

- Common service packages:
  - Network Surveillance
  - Traffic Signal Control
  - Traffic Information Dissemination
  - Traffic Incident Management
  - Emergency Routing
  - Transit Vehicle Tracking

- A total of 97 service packages exist in the current version of the National ITS Architecture

- Kingsport selected 35 ITS service packages in 2008
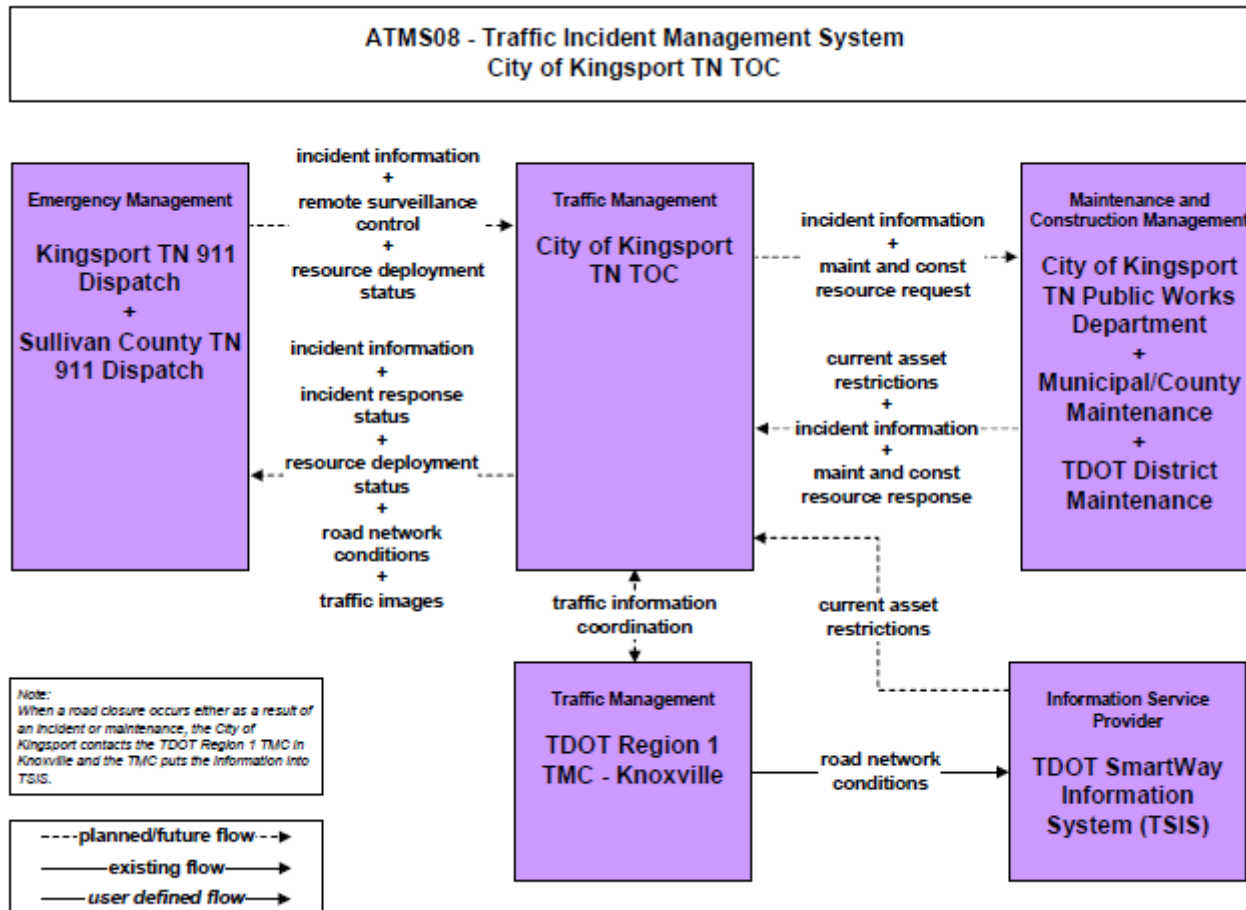

Kimley»Horn   TN TDOT Department of Transportation

# Identify Projects for Deployment in the Region

- Development of an ITS Deployment Plan for the Region

- Prioritizes projects into:
  - Short-term (next 5 years)
  - Mid-term (5 to 10 years)
  - Long-term (beyond 10 years)

- For each project the following information is included:
  - Project description
  - Responsible agency
  - Estimate of probable cost
  - Applicable service packages

- Does not guarantee funding of the projects

Kimley»Horn   TN TDOT Department of Transportation   KINGSPORT METRO Transportation Planning Organization

Benefits of an ITS Architecture and Deployment Plan

- Provides vision for ITS deployment and operations in the Region

- Supports resource sharing and interoperability of systems

- Supports long range planning through a phased plan for ITS deployment and integration

- Assists agencies in looking of federal funding opportunities

- Meets USDOT requirement that ITS projects funded with federal transportation funds conform to its regional ITS architecture

ITS Architecture Work Plan

October 25, 2016

Stakeholder Kickoff Meeting

→ Stakeholder Interviews

→ Draft Regional ITS Architecture

To Be Determined

Stakeholder Review Workshop

→ Revised Regional ITS Architecture

→ FHWA and TDOT: Review and Issue Ready-for-Use Letter

Deliverables

- Regional ITS Architecture Update and Deployment Plan Report

- Executive Summary

- Turbo Architecture Database
  (Version 7.1 of Turbo Architecture)

- Project Website

http://www.kimley-horn.com/Projects/

TennesseeITSArchitecture/kingsport.html

Kingsport Regional lTS Architecture History

- First Regional ITS Architecture completed in August 2008
  - Used National ITS Architecture Version 6.0
    (Currently on Version 7.1)
  - Used Turbo Architecture Version 4.0
    (Currently using Version 7.1)

- This effort is the first to update the Regional ITS Architecture plan

Kingsport Regional ITS Architecture Update

- Current effort will complete the Regional ITS Architecture update in early 2017

- Reason for update
  - Changes and additions to the National ITS Architecture
  - New stakeholder agency representatives in the Region
  - New ITS deployments in the Region
  - Updated Regional ITS Architecture important to meet ITS architecture USDOT conformity rule
  - Stakeholders set a goal to update the plan every 5 years

Kimley»Horn   TN TDOT Department of Transportation   KINGSPORT METRO Transportation Planning Organization

Kingsport Regional Boundaries

The regional boundaries have been defined as the boundaries of the Kingsport Metro TPO Planning Area

Sullivan County, TN (Western)
Hawkins County, TN (Northeastern)
Washington County, TN (Extreme North)
Scott County , VA (South Central)

Connections will be added to all agencies outside the regional boundaries as appropriate

Kingsport Regional ITS Architecture
will be coordinated with the
Bristol and Johnson City Regional ITS Architectures

Kingsport MPO Planning Area
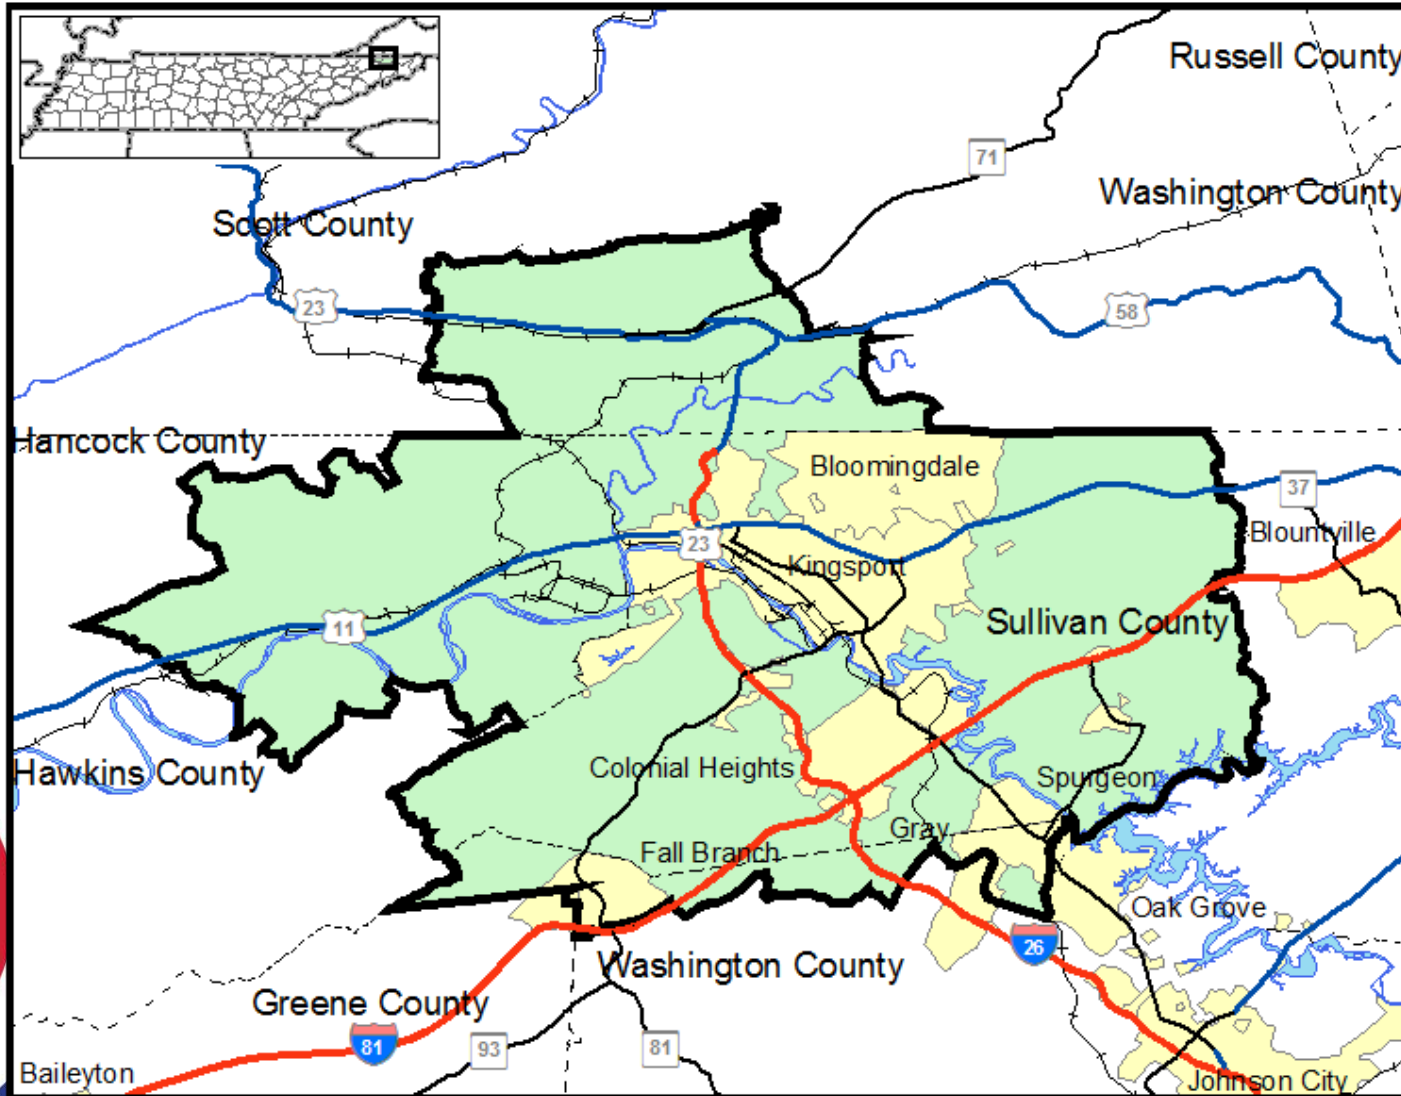

Kingsport Regional ITS Stakeholders

CITIES & TOWNS

- City of Kingsport
- City of Church Hill, TN
- Town of Gate City, VA
- Town of Mount Carmel, TN
- Town of Weber City, VA

COUNTIES

- Sullivan County, TN
- Hawkins County, TN
- Scott County, VA
- Washington County, TN

TRANSIT

- Kingsport Area Transit Service
- MEOC Transit
- N.E.T. Trans (First Tennessee HRA)

STATE

- Tennessee DOT
- Virginia DOT
- Tennessee Highway Patrol
- Virginia State Police

FEDERAL

- Federal Highway Administration

MPOs

- Kingsport MPO
- Bristol MPO
- Johnson City MPO

Kimley»Horn   TN TDOT Department of Transportation   KINGSPORT METRO Transportation Planning Organization

Presentation Overview

Overview of ITS
- What is ITS?
- ITS Benefits
- ITS Applications

Overview of Regional ITS Architectures
- What is a Regional ITS Architecture?
- ITS Architecture Development Process
- Benefits of the Regional ITS Architecture

Discussion
- Existing and Planned Projects in the Region
