

✦ Building your Smart Cities ecosystem starts with Traction™

Real time data - anytime, anywhere.

Traction Live is an easy-to-use browser and mobile solution delivering real-time signal and ITS device data, anytime, anywhere. It features insightful dashboards, device maps, and mobile friendly lists to view, manage, and easily share data.

Stay connected.

Traction Live enhances your ATMS by delivering key ITS health indicators and alerts. Whether on the go, or in the office, Traction Live keeps you connected to your transportation network devices.

DATA ACCESSIBILITY

Never be without the information you need. Quickly view and manage ITS device data, anytime, anywhere.

CONVENIENCE

Enjoy ease of use throughout **TRACTION LIVE**. Clear insights and data views are only a few clicks away.

MULTI-AGENCY COLLABORATION

We know sharing data with key partners is important. We think it should be simple and automated, too. These goals are a reality thanks to **TRACTION LIVE's** stakeholder dashboards.

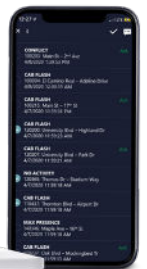

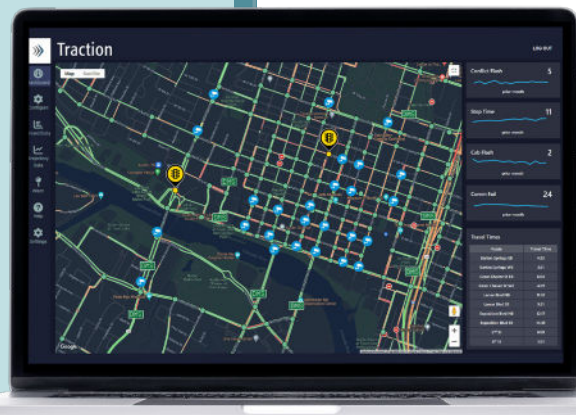

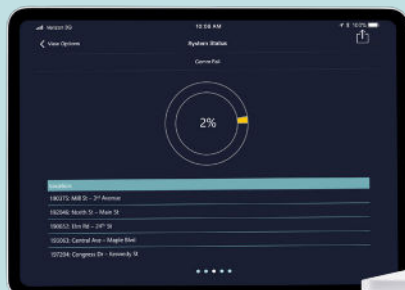

CROSS PLATFORM SUPPORT

Our browser and mobile app pair seamlessly to provide the optimal experience across all your devices. Our proven mobile app is available in the App Store and Google Play.

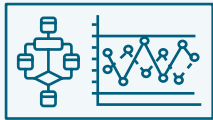

WHAT'S INCLUDED?

- ✦ Mobile application to monitor system alerts and issues on the go
- ✦ Access your signal status data any time of the day or night
- ✦ Easily share data with the click of a button

Easy-to-use features and capabilities

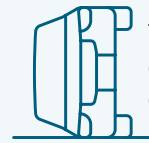

View dashboard on a video wall

Share data with partners

Monitor transportation network

Track conditions during special events or incidents

Automate multi-agency dashboards

Access TMC remotely during weather hazards

Traction Live is essential to our daily and emergency operations. During a severe, nine-day winter storm in February 2021, over 30% of our signals went into flash and many staff were unable to reach the TMC. Traction Live's remote monitoring kept us in constant awareness of our signal network, enabling us to act quickly when every moment mattered.
