

# Your Ports and Marine Terminal Partner

Kimley-Horn's broad experience with marine, waterfront, and port facilities illustrates our ability to manage projects of various sizes, types, and complexities. Many of our port and waterfront professionals specialize in civil engineering, environmental permitting, structural engineering, security, planning, rail engineering, transportation, freight handling, bulk materials and specialized cargo handling, and parking. We offer special insights into the services needed for ports and marine terminals development, approvals, and associated design processes. **From planning and permitting to design and construction administration/support, our team is ready to provide professional and innovative solutions for your most challenging assignments.**
